

Rain Garden for Birds and Butterflies

When these particular shrubs and perennials bloom, they generate valuable food sources for birds and butterflies. The blooms range from early spring into early fall and they are a great addition for anyone who enjoys learning about and watching native birds and butterflies

Note: Each plant you select will be used in the design; however, the exact number of individual plants will depend on the size of your garden. The plants selected for this rain garden theme were chosen for their beauty, their low maintenance, and their ability to thrive in wet and dry environments. The plants in the rain garden will be guaranteed for a prescribed period of time against natural problems. If they should fall victim to some natural cause during this guarantee period, they will be replaced at no cost to you.

Cut here and keep the top portion for your records.
