

We Need Your Help!

The **Westmoreland Conservation District** and the **Westmoreland County Department of Planning and Development**, with the authorization of our County Commissioners need your help over the next two years to provide guidance and feedback as we pursue the creation of an **Integrated Water Resources Plan** plan to address water related issues and to identify water related problems and possible solutions.

You are invited to participate in this groundbreaking effort to create the **Integrated Water Resources Plan (IWRP)** for Westmoreland County by becoming part of the **Watershed Planning Advisory Committee (WPAC)**. We need **YOU** to provide information and feedback on water related issues. The WPAC will meet 4 to 6 times over the next two years to create a plan that meets all our needs.

Join the **WPAC** by contacting us at 724-837-5271 or waterplan@wcdpa.com

What is the IWRP?

The **Integrated Water Resource Plan** is a County-wide plan to address ALL water resources:

- Stormwater
- Drinking water
- Sewage
- Water bodies and waterways
- Groundwater

The plan will provide guidance to all County residents and Municipalities in land development and regulation related to **water resources**.

The plan will also include a **decision making tool** to address water related issues and problems like clean water, flooding, sewage treatment and their potential solutions.

*Water is our
most
valuable
resource*
