

Rain Garden with Perennials Only

There are plenty of options for homeowners who prefer perennials over shrubs in their rain garden. Besides flowering plants, there is the option for using grass species to help create interest in the garden. Dried flower and seed heads create a nice winter effect.

A Select two (2).

Little Bluestem *Schizachyrium scoparium*

Height: 2-4 feet
Spread: 2-4 feet
Blooms: June-December

Fountain Grass *Pennisetum alopecuroides*

Spread: 12-18 inches
Blooms: May-July

White Turtlehead *Chelone glabra*

Height: 1-4 feet
Spread: 1-2 feet
Blooms: July-September

Note: Each plant you select will be used in the design; however, the exact number of individual plants will depend on the size of your garden. The plants selected for this rain garden theme were chosen for their beauty, their low maintenance, and their ability to thrive in wet and dry environments. The plants in the rain garden will be guaranteed for a prescribed period of time against natural problems. If they should fall victim to some natural cause during this guarantee period, they will be replaced at no cost to you.

Cut here and keep the top portion for your records.
